Chapped or cracked lips are a condition where the lips become dry, this is due to the layer of oil that is naturally produced by the body to coat the lips is removed or lacking. Severely dry lips are characterised by dry flaky skin, deep or red cracks, soreness and discomfort. Causes of this condition vary, most of the time dry lips are a result of moisture loss due to dehydration, too much exposure to wind or too much sun. However, when health problems exist, dry or cracked lips could be one of the many symptoms.

## Lip Balm - 10g

Concentrated formula contains a synergistic blend of ingredients specially designed to hydrate and soften severely dry lips, keeping them smooth and looking healthy.

- Visible results in 1 day
- The first and only medically proven lip balm with Urea
- Contains 2.5% Urea
- 3 way action provides relief faster with Camphor, Clove Oil and Menthol to alleviate the soreness and discomfort
- Provides relief from the drying side effects of certain medications such as those used to treat acne, vitamin deficiencies or cancer

### INCREASE IN LIP MOISTURE\*

## Lip Balm SPF 50+ - 10g

The only medicated lip balm for the treatment of extreme dry lip conditions with ultra-protectant SPF 50+, to protect chapped lips from the sun.

- Can be used during the day before going out in the sun
- Ultra-protectant - combination of 7 active sunscreen ingredients provides broad spectrum sun protection
- Intense moisturising with around 60% moisturising emollients
- 2.5% Urea provides necessary exfoliation
- 3 way action provides relief faster with Camphor, Clove Oil and Menthol to alleviate the soreness and discomfort

ALWAYS READ THE LABEL USE ONLY AS DIRECTED. IF SYMPTOMS PERSIST SEE YOUR DOCTOR/ HEALTHCARE PRACTITIONER

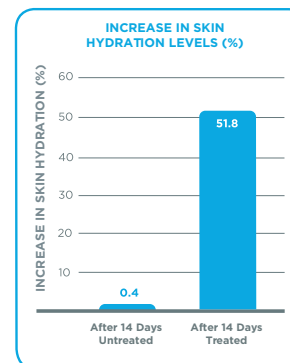

The Dermal Therapy range of therapeutic skincare is clinically proven to treat anhydrotic skin conditions known as Xerosis. It also provides symptomatic relief from scaly skin, Ichthyosis, Dermatitis, Eczema and Psoriasis, due to its additional keratolytic properties for added exfoliation and emollient penetration synergy.

## Very Dry Skin Cream - 125g & 250g

**INCREASES SKIN HYDRATION BY 52%\***

Clinically proven treatment for very dry skin across three independent trials

- A thick and rich cream suitable for patches of affected dry skin areas
- Visible results in 1 day
- Contains 12.5% Urea and 1% Dimethicone in a synergistic blend of emollients and skin conditioning agents
- Non-greasy formula

\*The results are from a study conducted by Dermatest® GmbH in Germany, an independent testing facility as commissioned by LaCorium Health Australia Pty Ltd.

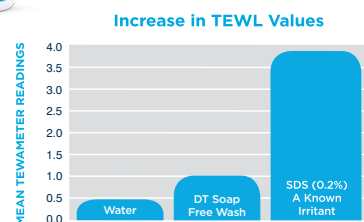

Formulated with naturally derived ingredients and free from parabens, sulfates, colours and fragrances.

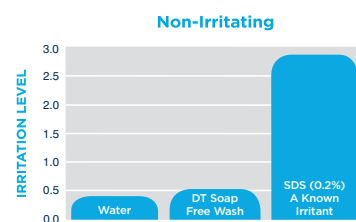

## Soap Free Wash - 250mL & 1L

**CLINICALLY TESTED TO BE NON-IRRITATING**

- Soap free formula, pH balanced, foams during use
- Suitable for sensitive and dry skin
- Coconut oil based cleansing agent as opposed to sulfate based agents which can be more irritating
- Active ingredient: Salvia Sclarea extract using Xerophyte Plant Technology

Dermal Therapy Soap Free Wash did not produce any drying effects on the skin

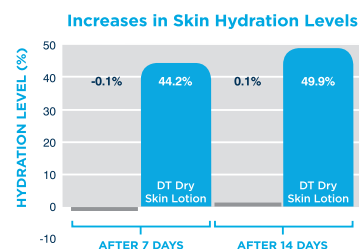

Dermal Therapy Soap Free Wash is 4.8 times less irritating than SDS\*

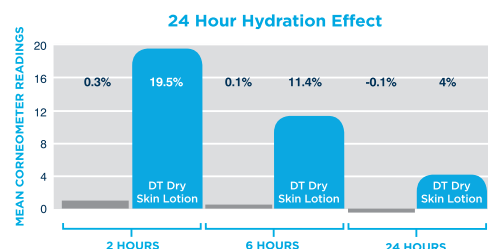

## Dry Skin Lotion - 250mL & 750mL

**INCREASES SKIN HYDRATION BY 50%**

- Unique formulation with Salvia Sclarea extract using Xerophyte Plant Technology
- Suitable for sensitive and dry skin
- Clinically proven to moisturise up to 24 hours from a single application
- Non-greasy formula that is instantly absorbed

Clinically proven to increase skin hydration levels by 50% in 14 days\*

Significant hydration levels were detected over a 24 hour period after a single application

Eczema is a recurring skin condition affecting 1 in 3 Australians at some stage throughout their lives. The skin becomes red, dry, itchy and scaly, and in severe cases, may weep, bleed and crust over, causing the sufferer much discomfort. The condition can also flare and subside for no apparent reason. Dermal Therapy's Skin Relief Range can be used long term or on an ongoing basis to help with the management of Eczema & Psoriasis.

## Skin Relief Cream - 50g

**SUITABLE FOR DRY, SENSITIVE OR INFLAMED SKIN**

- For the management of Eczema and Psoriasis
- Mild, soothing and moisturising cream for the relief of dry, itchy or sensitive skin due to extreme dryness
- May extend time frame between flare ups and reduce the use of topical corticosteroid
- Non-irritating, SLS and Paraben Free
- Steroid Free
- Suitable to use on face and body with no harsh chemicals
- Free from nut oils, artificial fragrances and colourants

ALWAYS READ THE LABEL USE ONLY AS DIRECTED. IF SYMPTOMS PERSIST SEE YOUR DOCTOR/ HEALTHCARE PRACTITIONER

TREATMENT

## Skin Relief Moisturising Lotion - 250mL

ALWAYS READ THE LABEL USE ONLY AS DIRECTED. IF SYMPTOMS PERSIST SEE YOUR DOCTOR/ HEALTHCARE PRACTITIONER

MAINTENANCE/ PREVENTION

## Anti-itch Soothing Cream - 85g Anti-itch Soothing Lotion - 250mL

RELIEVES ITCHY SKIN IN MINUTES

- Calms, relieves and soothes painful, itchy, red or swollen skin
- Unique 3 way action in an intense moisturising base with Colloidal Oatmeal, Canadian Willowherb and Menthol
- Suitable for sensitive skin
- SLS, Paraben and Petrochemical Free

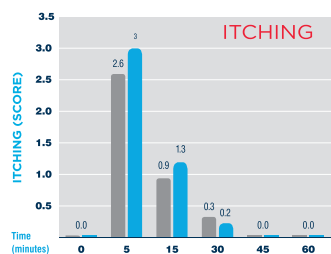

The reliance of synthetic composites is seldom challenged by an effective natural skin itch solution, without side effects.

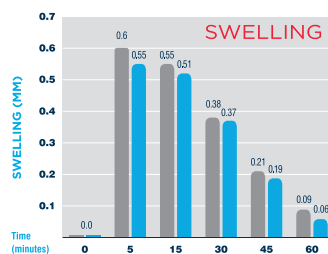

**Anti-itch Soothing Cream** resembles a commonly compounded formulation produced by dermatologists to manage and to treat dry, itchy skin commonly associated with skin conditions such as inflamed eczema and psoriasis.

## Works as well as 1% Hydrocortisone Cream!

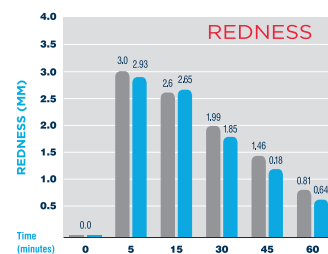

● Anti-itch Soothing Cream ● 1% Hydrocortisone

Anti-itch Soothing Cream performed incrementally better at alleviating itching at the 30 minute time point.

Anti-itch Soothing Cream outperformed the 1% Hydrocortisone Cream on select measure points at time intervals 30, 45 and 60 minutes.

Anti-itch Soothing Cream outperformed the 1% Hydrocortisone Cream on select measure points at time intervals 30, 45 and 60 minutes.

Clinical studies have proven **Anti-itch Soothing Cream** to work just as effectively as the 1% Hydrocortisone Cream. Results showed a general parity in performance against the 1% Hydrocortisone topical cream and in some instances, outperformed the respective control product.

The study above was conducted on 10 subjects ( $\geq 18$  yrs), who applied the Anti-itch Soothing Cream on their forearms against the two control products. With a single application frequency, itching, swelling and redness were set as the testing parameters of the study.

Very dry hands are caused by quick moisture loss due to detergents, excessive cleaning, harsh environments or due to side effects of medication. Dermal Therapy Hand Balm hydrates, softens and protects very dry skin and chapped hands. The Urea removes the dead skin cells and allows the moisturiser to penetrate the deeper layers of the skin.

## Hand Balm - 50g

RAPID RELIEF FOR VERY DRY HANDS

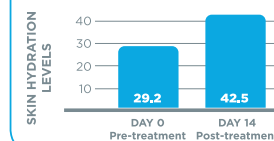

Clinically proven to significantly increase hand moisture levels and reduce the dermatological symptoms associated with severely dry hands.

- Contains 10% Urea and 2% Dimethicone in a synergistic blend of emollients and skin conditioning agents
- Non-greasy formula
- Fast acting, visible results in 1 day!

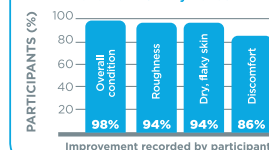

The formula has been fortified with Vitamin E to replenish your skin from the first application and condition the skin from free radical damage. Unlike many other moisturisers, it is richly formulated, so a little goes a long way!
