

# Atrauman<sup>®</sup> Silicone

The new silicone contact layer  
from HARTMANN

Soft, can be cut to size,  
thin, can be left in place  
up to 7 days.

The very thin weave of Atrauman Silicone prevents the newly formed granulation tissue growing through the dressing, while allowing the easy passage of exudate through to the secondary dressing.

## A wide range of indications

**Skin Tears**

**Burns**

**Abrasions**

**Grafts &  
Donor sites**

**NPWT**

**Challenging areas**

## Provides secure, atraumatic protection

The new Atrauman Silicone is specifically designed for sensitive skin, to provide secure and atraumatic wound care.

### Benefits

- Maximum patient comfort thanks to atraumatic and pain-free dressing changes.
- Easy to use: can be cut, very thin and conformable for optimal contact with the wound bed.
- Cost effective: can be left in place for up to 7 days, often only the secondary dressing needs to be changed.

*“Sometimes what appears to be a minor injury can prevent you doing the things you love. Having the right dressing for me has made such a difference.”*

*-Dave Miller, 72*

THREE SIZES

### APPLICATION:

Suggested fixation:  
**Peha-haft**, cohesive bandage  
**Omnifix**, non woven tape  
**Hydrofilm**, Waterproof film
