# HYPAFIX® TRANSPARENT

The skin-friendly, highly breathable **wide-area fixation film** is designed to protect reliably against water, bacteria and contaminants.

## INDIVIDUAL TREATMENT OF EVERY WOUND SIZE

- **Hypafix® transparent** comes on a roll in various widths
  - ▶ All wound sizes can be protected as **Hypafix® transparent** can be cut to the desired length and shape
  - ▶ Very economical, cost-efficient

### Expert tip

#### Waterproof protection for every dressing

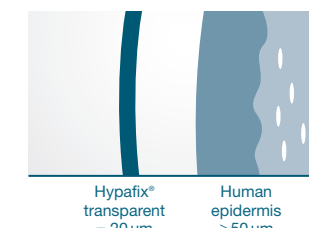

**Hypafix® transparent** can be applied in combination with other dressings or wound pads to waterproof them. Consequently patients can take a shower or even participate in **hydrotherapies**.

## UNIQUE APPLICATION TECHNIQUE WITH DISTINCTIVE RED STRIP

- Allows for easy and quick application

Hypafix® transparent is ultra-thin – actually thinner than the human dermis.

## ULTRA THIN AND CONFORMABLE FILM

Transparent with low friction and matt surface

- Dressing is hardly noticeable on skin, neither visibly nor by touch

### Protective barrier

- Protects reliably against water, bacteria, viruses and contaminants
- Allows patients to continue on with activities of daily living

### Highly breathable and conforming

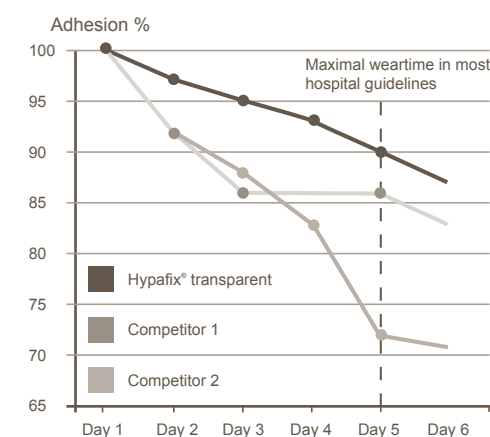

- Prevents skin maceration and tension blisters
  - ▶ High wearing comfort for patients

### Excellent adhesion and flexibility

- Reliably secures and protects wound pads and primary dressings as well as instruments, probes, catheters and measuring devices
- Allows patients to continue on with activities of daily living

## MORE RELIABLE ADHESION

Results from a comparative evaluation on skin show that the **Hypafix® transparent** film has a **permanently higher adhesion** than competitive products.

### Indications

- Fixation of dressings, tubes, catheters, measuring devices and other instruments
