

RHS 202/RHS 214/RHS 212// SURFACE DISINFECTING PRODUCTS

Reynard’s surface disinfecting products are alcohol, chlorine and fragrance free to avoid any tainting problems should food be placed in contact with a wiped surface. They contain a very low foaming, biodegradable non-ionic surfactant, which exhibits good detergency for the emulsification of fatty/greasy soils. These surface disinfection products contain a range of Active Biocides designed to target a broad spectrum of micro-organisms.

Technical Performance:

Bactericidal—MRSA, VRE, E Coli, Pseudomonas Aeruginosa, Staphylococcus aureus, Listeria, Salmonella & Enterococcus hirae

Mycobactericidal—Mycobacterium avium, Mycobacterium terrae

Fungicidal—Aspergillus Niger

Virucidal—Influenza A (H1N1), HIV, Hep B, Vaccina, Norovirus

Sporicidal—C Diff

These Multi Surface Disinfection products have been tested as per EU Standards, EN1276, EN13727, EN14348, EN13704, EN1650 and EN14476
